

SMB Foundation Training Program

The SMB Foundation is unique, in that it is a SKILL BASED training program. Daily lesson plans have been crafted using hundreds of written lectures, classroom lectures, trading videos, audio lectures, quizzes, simulated trading drills, one-on-one mentoring sessions, and daily execution drills to build a powerful trading foundation. The SMB Foundation teaches a craft - the craft of trading.

What the SMB Foundation is not, is a simple knowledge based program that asks traders to memorize technical patterns, indicators, and trading plays found in countless books and programs online. The hard truth is that much of these technical patterns, indicators, and trading plays are worthless without the trading skills necessary to trade them effectively. Statistically, trading skills take years of experience and lost money to develop, but SMB Capital reduces this learning curve by creating a demanding curriculum focused on trading skills, followed by the development and execution of trading plays that work best for the trainee.

There are no secret trading plays that always work. Being a consistently profitable trader is about the adjustments made using trading skills. During the SMB Foundation trainees are taught how to build trading plays that work best for them. Instead of trainees memorizing trading plays without understanding how and why they work, trainees are taught a proprietary method to build trading plays using the trading skills learned in the program. Trainees are mentored through this process, building simple trading plays that work best for new traders and eventually building more robust trading plays specific to the trainees trading personality. Armed with these skills, traders finishing the SMB Foundation are far more mentally and physically prepared to trade professionally, than any other program available to the public in the United States. For traders, the SMB Foundation truly epitomizes the old proverb: Give a man a fish, feed him for a day. Teach a man to fish and you feed him for a life time.

A trainee does not have to have any prior trading experience before starting the SMB Foundation. SMB builds traders from the ground up. The training program is laid out over a 30-day calendar. Daily lesson plans have been crafted covering every minute of the trading day, from 8am to 6pm EST, including weekend and evening written lectures and videos. Traders may choose to work through the SMB Foundation 30-day schedule like a trader at SMB Capital or spread the program out over two months to accommodate any time conflicts (we regularly extend the program even further at no cost to the trainee).

Below is a list of the major categories covered in the SMB Foundation. Each category may contain dozens of sub-topics made up of dozens of additional written lectures, trading videos, class room lectures, audio lectures, drills, and quizzes:

The first four weeks will focus on skill development:

- Stock selection
- One Good Trade
- The 7 fundamentals
- The Playbook

- Technical Analysis
- Psychology
- Risk management
- Tape Reading

The last two weeks will focus on the building and executing of trading plays with one-on-one mentoring:

- Trading Process
- Trader Performance
- Trade Execution
- Trading Edge
- Trading Strategies
- Trade Setups

SMB trains traders on an individual base remotely or in office. Trainees may start the SMB Foundation at a time that best suits their schedule. Being able to work through the program independently with a mentor gives trainees a more personalized experience without having to compete for attention. Mentors usually work with no more than two trainees at a time through the SMB Foundation training program, assuring a trainee focused guidance. At the end of the SMB Foundation, and one-on-one mentoring, trainees will receive a full evaluation on the skills they are doing well and what needs improved; along with a road map to make trading a career. Trainees will be graded on 21 key attributes found in consistently profitable traders at SMB and extended the opportunity to develop as a trader under the coaching of SMB Capital mentors.

Syllabus

Day 1

Introduction

Read: SMB Capital Introduction, & Sign SMB Contract

Watch: Standards in This Job by Bella (9 min)

Read: Appropriate Behavior on Our Desk

Read: Book Recommendations

Read: A Point of Clarification: What we teach our traders
